“ George, I really hope you and Karen are sitting up in Heaven looking down on us right now. You were like a second dad to me, you were Danny's best friend and you were Raes George, Graeson and Amiah loved you too but only Rae could say my George, Graeson had just started saying your name about a month before I lost them temporarily. I still don't know how I'm going to break it to Rae that her George and Karen are gone and we can only take her to a grave to decorate to see her George again. I really hope you know the impact you left on me and my little family and the impact you left on those who were always around. I still can't believe you're gone, we were just talking about coming to stay with you when the kids got to come, it broke my heart when I got that call, all I could do was hang up I didn't know what to say I was in complete shock and denial. I'm still in denial, it just doesn't feel real but I promise I will make sure your only wish is done and that's for you to be buried with that picture of Karen. You are loved and missed dearly..
